

BRAND AND UI GUIDELINES

Make AIO Fusion feel **one system**, without flattening its contexts.

A draft, source-based audit and proposed reference for the public marketing experience, focused onboarding and authenticated product. It names the real drift, preserves deliberate exceptions and protects the client-approved Project Hub.

Status: proposed, not approved implementation

Date: 16 September 2026

Owner: product and brand review

Important review boundary. This is a draft source-based audit, not a complete visual review or implementation approval. Authenticated review remains pending and is not complete. The current workspace home screenshot is evidence for route / only. Any other authenticated recommendation remains pending visual review unless labelled as a source observation or a prior fixture capture.

01 / EXECUTIVE SUMMARY

Converge the language, not the product surfaces.

The source already has a coherent character: warm editorial marketing, a focused pink and navy onboarding flow, and a cool, information-dense workspace. The audit finds token drift and casing drift, not a case for a new component library. Use one typographic hierarchy, role-based colour tokens and explicit context exceptions. Keep Project Hub exactly as approved.

GENUINE DRIFT

Type token mismatch

Source uses Alice for headings, while the global theme names DM Serif Display before Georgia. Proposed guidance approves Alice, Georgia, serif, so the token drift must be reconciled later.

GENUINE DRIFT

Colour roles split

Marketing uses dark teal #102B36 and cream. Product uses navy #0A1628 and cool neutrals. Both can remain when named by context, rather than treated as accidental duplicates.

INTENTIONAL DENSITY

Navigation and cards

Compact settings navigation, dense tables and the Hub's larger cards serve different tasks. Do not normalise these into a single density or card template.

Decision in one line

Adopt Alice plus Inter as the shared voice, pink as selection and action accent, navy or teal by surface, amber for the global keyboard focus cue, and documented exceptions for marketing, onboarding and Project Hub.

02 / EVIDENCE AND SCOPE

Read the source honestly.

The labels below are part of this document's evidence language. They prevent a source inspection from being presented as a full visual QA pass.

Coverage matrix

SURFACE	EVIDENCE AVAILABLE	REVIEW STATE
Marketing home	Source: artifacts/aio-fusion/src/marketing/LandingPage.tsx, MarketingPage.tsx; screenshot reference below.	OBSERVED SCREENSHOT Source and current workspace home screenshot reviewed.

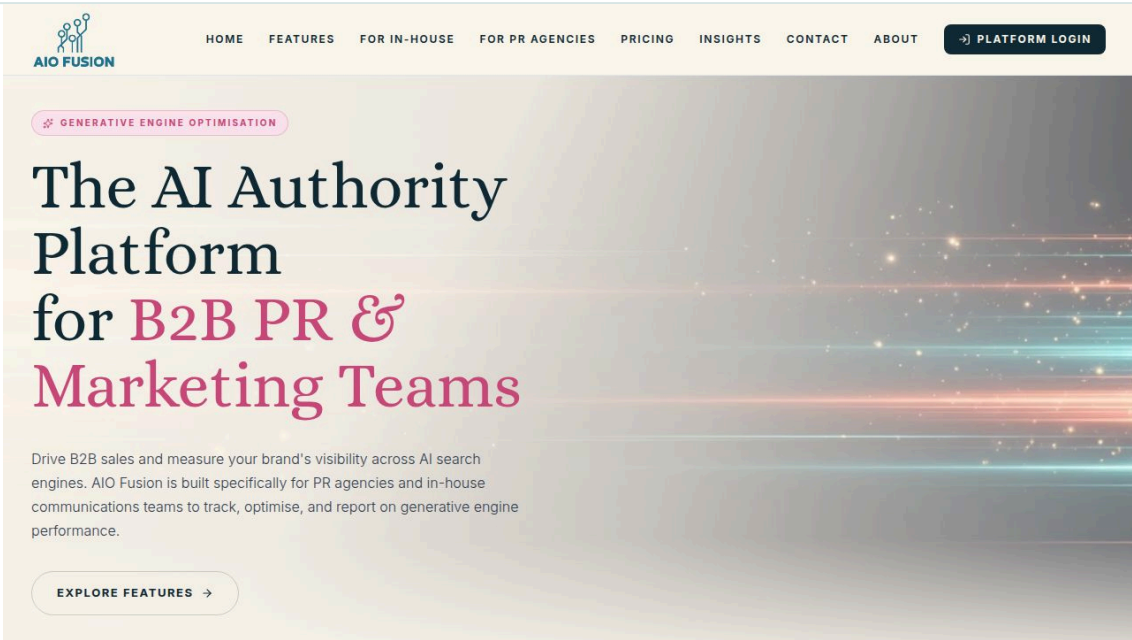

SURFACE	EVIDENCE AVAILABLE	REVIEW STATE
Other marketing	Source-reviewed: artifacts/aio-fusion/src/marketing/AboutPage.tsx, artifacts/aio-fusion/src/marketing/ForAgenciesPage.tsx, artifacts/aio-fusion/src/marketing/ForAgentsPage.tsx, artifacts/aio-fusion/src/marketing/ForInhousePage.tsx, artifacts/aio-fusion/src/marketing/PricingPage.tsx, artifacts/aio-fusion/src/marketing/InsightsPage.tsx, artifacts/aio-fusion/src/marketing/ContactPage.tsx, artifacts/aio-fusion/src/marketing/TrustSecurityPage.tsx and artifacts/aio-fusion/src/marketing/ArticleDetailView.tsx.	PENDING Public-page visual review remains pending.
Project Hub	Source: artifacts/aio-fusion/src/pages/PlatformHomepage.tsx, global tokens in artifacts/aio-fusion/src/index.css.	KEEP EXACTLY No redesign proposed.
Settings and account	Source: artifacts/aio-fusion/src/pages/SubAccountsPage.tsx, CSS, security and billing components; prior isolated fixture captures exist.	PENDING Prior fixtures are isolated API captures, not evidence for this current workspace screenshot or authenticated role coverage.

SURFACE	EVIDENCE AVAILABLE	REVIEW STATE
Onboarding and set-up	Source: artifacts/aio-fusion/src/pages/FocusedOnboardingShell.css, artifacts/aio-fusion/src/pages/FocusedOnboardingShell.tsx, artifacts/aio-fusion/src/pages/GuidedOnboardingPage.tsx and artifacts/aio-fusion/src/IntakeForm.tsx.	PENDING Focused visual review by role is required.
Tools and reports	Source: artifacts/aio-fusion/src/pages/OptimiserPage.tsx, artifacts/aio-fusion/src/pages/PlannerPage.tsx, artifacts/aio-fusion/src/pages/MediaResearchPage.tsx, artifacts/aio-fusion/src/pages/MediaDatabasePage.tsx, artifacts/aio-fusion/src/ReportPage.tsx, artifacts/aio-fusion/src/pages/DiagnosticPage.tsx and artifacts/aio-fusion/src/SeoAuditPage.tsx.	PENDING Source-reviewed; rendered review not claimed.

Evidence labels

- OBSERVED IN SOURCE** Exact source reference found in the current tree.
- OBSERVED SCREENSHOT** Visible in the current workspace home screenshot, with provenance stated.
- APPROVED EXCEPTION** Deliberate context or density difference retained.
- PENDING VISUAL REVIEW** Recommendation not validated across rendered states, role or viewport.
- PROPOSED GUIDELINE** Direction for review, not an implementation instruction or compliance claim.

This document does not claim that all routes rendered, that all authenticated states were accessible, or that recommendations are WCAG conformance results.

Current workspace home screenshot: docs/brand/references/home-workspace.jpg, freshly captured this turn from route /, 1280 x 720. It is current workspace home visual evidence, not a claim of staging or authenticated role coverage for every route.

03 / FOUNDATIONS

Editorial warmth, operational clarity.

Use these as proposed design tokens and writing rules. They are not a request to change app or source styles in this documentation task.

Colour role map

-  **Marketing teal**
#102B36
Marketing headings, footer and editorial ink.
-  **Product navy**
#0A1628
Authenticated headings and secondary actions.
-  **Hub teal**
#1A647B
Existing Project Hub context. Preserve.
-  **Raspberry**
#C8497A
Primary action, selection, active accent and links.
-  **Marketing cream**

#FBF6EC
Public editorial canvas.

Product cool
#F8FAFC
Product canvas and utility surfaces.

Settings mint
#F5FAF9
Settings background.

Keyboard focus
#F59E0B
Global cue, distinct from pink selection.

Contrast calculations

Calculated from sRGB relative luminance and rounded to two decimals. Pair measurements only, not a blanket accessibility claim.

PAIR	RATIO	USE NOTE
#102B36 on #FBF6EC	13.72:1	Recommended marketing reading pair.
#0A1628 on white	18.13:1	Recommended product reading pair.
#C8497A on white	4.48:1	Pink may fail a 4.5:1 small-text target. For normal buttons, prefer dark text on a light surface, or a darker pink subject to approval. Do not treat large white text as the standard fix.
#F59E0B on #0A1628	8.44:1	Measured focus-outline relationship.
#15803D on white	5.02:1	Pair with text or icon, never colour alone.

Typography scale

Grow AI authority.

Display / 60px max / Alice, Georgia, serif fallback / 1.05

Project and page title

Page / 50px max, 32px mobile / Alice stack / 1.12

Use Inter for body copy, controls, labels and data. Keep line length comfortable.

Body / 15px / 1.7 / Inter stack

Font note: no local Alice or Inter font file was found in the reviewed source tree. Final HTML uses explicit system fallbacks only and loads no external font.

Spacing and shape

- Use a 4px base rhythm: 8, 12, 16, 24, 32, 40, 56 and 72.
- Reading cards use a 16px radius and 24 to 36px padding.
- Ordinary product controls: 44px minimum height, 12px radius, 13px Inter bold.
- Compact row actions: 36px minimum height, 10px radius, 12px text.
- Inputs: 44px minimum height, 12px radius, visible label, helper and error copy.

Do not flatten density

The Hub's large create, archive and guidance cards are not ordinary form-button templates. Dense settings navigation and report tables are task-specific.

04 / PATTERNS

Rules that travel well.

These specimens are illustrative guidelines, not screenshots and not a component-library implementation.

Buttons and interactive states

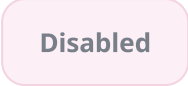

Primary action

Secondary

Outline

Text action

Compact row action

Specimens only. Product buttons follow current `.aio-button` proportions. Marketing may use 8px radius and shorter CTAs.

- Hover: modest brightness or border shift.
- Active: one-pixel press or tone shift.
- Focus-visible: 3px amber outline with 3px offset and dark offset ring. Pink means selection, not focus.
- Disabled: reduced opacity and no pointer affordance.
- Destructive actions use explicit red and confirmation copy.

Forms and subsections

- Every control has a visible persistent label. Placeholder is an example, not the label.
- Group related fields with clear headings. Keep errors adjacent, specific and announced where appropriate.
- Use pink for selected choice and amber for focus. Use status colour with text or icon, not colour alone.
- On mobile, stack fields before shrinking type and avoid horizontal scrolling for ordinary forms.

Project Set-Up exception

The pink-wash mini bar is approved only for field-grouping headings on the first Project Set-Up page, per `.agents/memory/aio-fusion-subsection-headers.md`. Do not extend it to reports, diagnostics, media research or planner headings.

Cards, tables and status

- Give cards a clear title, supporting copy and one action hierarchy.
- Use pale pink for selected state, pale teal for neutral context and cool slate for utility surfaces.
- Dense tables may remain dense when scanning is primary. Provide a mobile scroll affordance.
- Status badges use sentence case in prose. Uppercase is for compact eyebrows and labels.

Navigation terminology

- Canonical label: **My Account**, not the source variant “My account”.
- Use **Project Hub**, not Dashboard, for the approved workspace home.
- Use **Back to website** and **Back to platform** in their respective contexts.
- Use **Project Set-Up**, **Media Research**, **Content Optimiser**, **Comms Planner** and **Reports**.

- Use UK spelling: optimise, organisation, personalised. Do not use em dashes.

Approved context exceptions

- **Marketing:** teal #102B36, cream #FBF6EC, editorial Alice headings and public navigation.
- **Focused onboarding:** standalone shell, pink selection, navy/teal icons and progress rail. No ordinary Settings navigation before setup completes.
- **Project Hub:** existing palette, card scale, navigation and density are protected. Isolate changes from Hub consumers.
- **Settings:** cool mint canvas, left navigation and ordinary form actions can follow the settings mapping without redesigning Hub.

- ## Approved context exceptions
- **Marketing:** teal #102B36, cream #FBF6EC, editorial Alice headings and public navigation.
 - **Focused onboarding:** standalone shell, pink selection, navy/teal icons and progress rail. No ordinary Settings navigation before setup completes.
 - **Project Hub:** existing palette, card scale, navigation and density are protected. Isolate changes from Hub consumers.
 - **Settings:** cool mint canvas, left navigation and ordinary form actions can follow the settings mapping without redesigning Hub.

05 / CONSISTENCY AUDIT

Actionable, section by section.

Keep preserves current behaviour or visual language. Change is a proposed future adjustment. Exception is intentional context. Pending means source review is not enough.

SECTION AND EXACT SOURCE PATH	KEEP	CHANGE OR DECISION	EXCEPTION / PENDING EVIDENCE
Public shell artifacts/aio-fusion/src/marketing/MarketingPage.tsx artifacts/aio-fusion/src/marketing/LandingPage.tsx	Alice heading intent, cream canvas, teal ink, navigation and pink accent.	Document one marketing token set. Align CTA casing and focus treatment later, in an isolated pass.	MARKETING CONTEXT Other routes need visual review.

SECTION AND EXACT SOURCE PATH	KEEP	CHANGE OR DECISION	EXCEPTION / PENDING EVIDENCE
Other marketing artifacts/aio-fusion/src/marketing/PricingPage.tsx artifacts/aio-fusion/src/marketing/ForAgenciesPage.tsx artifacts/aio-fusion/src/marketing/ForAgentsPage.tsx artifacts/aio-fusion/src/marketing/ForInhousePage.tsx artifacts/aio-fusion/src/marketing/InsightsPage.tsx artifacts/aio-fusion/src/marketing/ContactPage.tsx	Editorial hierarchy and source-specific content.	Replace isolated literals with named roles only after implementation is approved. Keep content and routing.	PENDING VISUAL REVIEW No claim that every route rendered.
Project Hub artifacts/aio-fusion/src/pages/PlatformHomePage.tsx artifacts/aio-fusion/src/index.css	Hub card density, navigation, existing #1A647B header and proportions.	Do not change as part of this guideline. Protect indirect shared CSS and shared button consumers.	KEEP EXACTLY Approved reference. Hub cards are not form buttons.
Account and Settings artifacts/aio-fusion/src/pages/SubAccountsPage.tsx artifacts/aio-fusion/src/pages/SubAccountsPage.css artifacts/aio-fusion/src/components/AccountSecurityCard.tsx artifacts/aio-fusion/src/components/BillingDetailsCard.tsx	Settings-only scope, Alice headings, Inter body and compact row actions.	Use canonical “My Account”. Keep ordinary controls at 44px and compact rows at 36px. Review focus and pink action roles separately.	ISOLATED SCOPE AUTHENTICATED ROLE VISUALS PENDING

SECTION AND EXACT SOURCE PATH	KEEP	CHANGE OR DECISION	EXCEPTION / PENDING EVIDENCE
Focused onboarding artifacts/aio- fusion/src/pages/Foc usedOnboardingShell. css artifacts/aio- fusion/src/pages/Foc usedOnboardingShell. tsx artifacts/aio- fusion/src/pages/Gui dedOnboardingPage.ts x	Standalone sequence, progress rail, Alice, pink selection and mobile transformation.	Keep outside permanent Settings navigation. Consider amber focus alignment later without changing selection semantics.	FOCUSED FLOW RENDERED ROLE REVIEW PENDING
Project Set-Up intake artifacts/aio- fusion/src/IntakeFor m.tsx	Project Set-Up naming, progress/status and pink-wash grouping.	Use the approved subsection pattern only here. Keep validation and prefill semantics.	SCOPED PATTERN Do not copy to reports, diagnostics, media or planner.
Tools artifacts/aio- fusion/src/pages/Opt imiserPage.tsx artifacts/aio- fusion/src/pages/Pla nnerPage.tsx artifacts/aio- fusion/src/pages/Med iaResearchPage.tsx artifacts/aio- fusion/src/pages/Med iaDatabasePage.tsx	Task density, data terminology and workflow affordances.	Apply role tokens and focus rules after visual inventory. Keep tables scannable and row actions compact.	SOURCE-REVIEWED ONLY

SECTION AND EXACT SOURCE PATH	KEEP	CHANGE OR DECISION	EXCEPTION / PENDING EVIDENCE
Reports and audits artifacts/aio-fusion/src/ReportPage.tsx artifacts/aio-fusion/src/pages/DiagnosticPage.tsx artifacts/aio-fusion/src/SeoAuditPage.tsx	Report cards, tables, statuses and print affordances.	Do not extend Project Set-Up pink-wash bar. Audit amber focus and status colours in rendered tables.	NO BROAD COMPLIANCE CLAIM

Genuine drift to resolve first

1. The global DM Serif token versus the approved Alice, Georgia, serif stack.
2. Marketing teal/cream versus product navy/cool palette without role names.
3. Button radius, casing and uppercase treatment.
4. My Account versus My account.
5. Orange global focus versus pink local focus.

Not drift to fix

- Hub card scale and deliberate density.
- Focused onboarding's standalone rail.
- Settings navigation versus report tables.
- Marketing editorial spacing.
- Context-specific button hierarchy when labelled and measured.

06 / ROLLOUT AND ACCEPTANCE

Ship the guardrails before the polish.

Roll out through small, reversible reviews. No app or source style changes are part of this documentation task.

Freeze the Hub boundary

Record the Hub as approved. Audit selectors for indirect shared CSS impact before settings or token changes.

2 / ALIGN

Resolve language tokens

Agree Alice plus Inter, role-based palette and terminology. Review marketing and product separately.

3 / VALIDATE

Review by role and route

Render desktop and mobile states for Direct Client, Agency Partner and Master before accepting implementation.

Acceptance checklist

- ☐ Current workspace home route / screenshot reviewed.
- ☐ Desktop and mobile marketing navigation reviewed.
- ☐ Desktop and mobile Hub reviewed unchanged.
- ☐ Settings rendered for Direct Client, Agency Partner and Master.
- ☐ Onboarding rendered for each permitted account role.
- ☐ Project Set-Up keyboard path reaches every field and action.
- ☐ Tools and reports checked at narrow viewport, including table overflow.
- ☐ Keyboard focus visible on links, buttons, inputs, selects and dialogs.
- ☐ Focus distinct from pink selection and hover.
- ☐ Loading, disabled, error and destructive states checked.
- ☐ Reduced-motion preference checked.
- ☐ Terminology uses My Account, Project Hub and UK spelling.
- ☐ No claim for routes or roles not actually rendered.
- ☐ Indirect CSS blast radius checked before implementation merge.

Non-goals

- No Project Hub redesign or palette replacement.
- No component library or global CSS refactor.
- No app/source style change, content rewrite, route rename, account operation or production change.
- No invented official logo clearspace measurement.

- No external fonts, images or dependencies in this HTML.
- No claim that fixture screenshots prove authenticated behaviour.
- No unsupported accessibility certification.

Logo use

The supplied colour logo is embedded as a PNG data URI. Keep artwork intact, do not redraw or crop it, and do not invent an official clearspace unit. Check contrast and background before choosing a logo variant.

Authenticated visual limitation. Settings, onboarding, tools and reports notes are source-reviewed recommendations. Prior settings fixture captures were isolated API fixtures with visible environment labels, not freshly validated staging and not proof of Direct Client, Agency Partner or Master authentication. Obtain current role-specific rendered evidence before calling this audit complete.
